🪪 PROFILE

Passionate iOS|Flutter Developer, creating aesthetically pleasing, clean, highly functional, scalable, and optimized applications. My current experience has mostly been in various startups where I've built applications from scratch trying to use the best coding practices, architectures, patterns.

🎓 EDUCATION

Computer Science Engineering, *Jaypee University Of Engineering And Technology* ↗   Sep 2020 – Aug 2024
Current CGPA: 8.4   Raghogarh-Vijaypur,
                                                                                                Madhya Pradesh

---

🧠 SKILLS

iOS/Flutter/React | Firebase/AWS/MongoDB

🗂 PROJECTS

Connect - iOS&Android-Flutter ↗
Connect is Chating application developed to connect each and every user via chatting, Connect voice call, Connect video call, Connect store, and many more upcoming features.
Developed using Flutter FrameWork for Android & iOS and Firebase for storing user's data. For Video and Voice calls I have used Agora ↗ SDK - Agora Voice Call SDK ↗ and Agora Video call SDK ↗ .

Vibeus - iOS&Android-Flutter ↗
Vibeus is a free dating app developed to connect our users all around the world without any subscription. The main motive of vibeus is to help users finding their perfect match without any subscription.
Developed using Flutter FrameWork for iOS and Android, used Firebase to store user's data and Cloud Firestore for real-time chat. OneSignale for in-app & push notification.
